Our Next 50 Years Begin

After a very busy 2014 full of celebrations marking our first 50 years, we have launched into the next half-century without pause. Following is a short recap of what has been happening around the Nature Center and a preview of good things to come:

Prescribed Burning
Under the careful oversight and direction of Natural Resource Manager Rob Denkhaus, at the time of this writing, the Nature Center has accomplished two prescribed burns in collaboration with the Fort Worth Fire Department (FWFD): 19 acres of the Alice Ashley Savanna on the north side of Shoreline Drive enroute to the Boardwalk on January 16 and 13 acres along the Deermouse Trail east of its intersection with the Oak Motte Trail on January 28. Plans have been approved for at least three more burns in 2015.

Periodic burning is critical to the health and vitality of grasslands. Fire removes thatch build-up, returns nutrients to the soil for recycling, and impedes the invasion of woody brush into prairies. Although they once occurred on a regular basis prior to European settlement of North America, fires have been mostly suppressed for the past two centuries. The best management practices for grasslands recommend the re-introduction of burning. We are fortunate to have a partner in the FWFD to execute this program safely.

Marsh Boardwalk Reconstruction
The Boardwalk was originally constructed in two phases in the early 1970s and 1980. Over the past 30+ years, as the structure has weathered and declined, Nature Center

FORT WORTH NATURE CENTER:
www.fwnaturecenter.org
The Friends and the Nature Center had quite a 50th celebratory year in 2014, and much of the credit goes to our immediate past president, Rick Shepherd. In total, Rick served four years as president of the Board. During this past year, Rick helped plan and execute our 50th Fort Worth Wild event held in Broadview Park and created and helped plan the art show, Broadview: A Spectrum of Nature, fundraisers which raised over $100,000 for the Nature Center. Of course, Rick had lots of assistance from the Board members, Nature Center staff, and volunteers, but it was his vision and attention to detail that made these events so special and successful. These were just the major events, but Rick also oversaw many other activities and spent countless hours helping bring about the success of the 2014 celebratory year. We all owe Rick a big thank you for his dedication and determination, especially for his four years as president.

I also want to recognize two of our former Board members, Pat Hyer, who served so well as our recording secretary, and Sue Harvison, who raised many dollars and in-kind gifts from within her community and contributed invaluable ideas and suggestions. They both are missed, and we thank them for their service.

I am excited to announce two new Board members, Tom Armstrong and George Bristol. Tom, cousin of both Murray James and her daughter, Laura Harrison, brings to the Board CEO/presidential experience as the recently retired CEO of Bradken, a publicly traded Australian company. He currently serves as a member of the Leadership Fort Worth program. Most important about Tom’s role on the Board is his interest in the outdoors and conservation. Welcome, Tom! George brings to the Board a solid reputation as a businessman, fundraiser, politician, conservationist, and author, which should pique your interest in knowing more about him. George has agreed to give a presentation at our annual meeting on July 11. More on that later. Welcome, George! Nature Center Manager Suzanne Tuttle and I had the opportunity to give a tour of the Nature Center to both Tom and George on separate occasions.

As exciting as 2014 was, so much is in the works for 2015 as well. We are anticipating Boardwalk repairs to begin later this year, with completion slated for early 2016. Restoration to the levee (embankment) that enables visitors to walk the Cross Timbers Trail is in the process of engineering studies. In the meantime, temporary access to the trail is available across the river. In addition, we are exploring the future of Broadview Park and have received architectural plans from Paul Dennehy, winner of the prestigious National Leicester B. Holland Prize for his one-page drawing of Broadview Park Pavilion awarded by the American Institute of Architects. Stay tuned for future updates.

We have new staff (see article on page 7) and, after losing our barred owl, now have a non-releasable juvenile red-shouldered hawk, which is being trained for demonstrations. Come out and meet him!

The Friends is in year three of our strategic plan, and we continued on page 6
Our Next 50 Years Begin…
continued from page 1
resource management staff has kept it functional and safe with partial rebuilds; however, patching is no longer possible. Due to a partial collapse, the lower run of the structure is now closed; fortunately, a plan for a complete rebuild is nearly complete.

Paul Dennehy of Fort Worth’s Dennehy Architects, Inc. was selected as our design contractor, and his plan is on schedule to be submitted for approval. We anticipate construction to commence in late summer, with a projected completion date in early 2016. Funding for this project is provided from the City of Fort Worth’s 2004 General Obligation Bond Program and the sale of Certificates of Obligation in 2013. During construction, the entire area will be closed to visitation. We will keep you informed through our website, Facebook page, and this publication.

Cross Timbers Trail Access Stabilization
The Nature Center’s second construction project-in-progress is the stabilization of the access embankment to the Cross Timbers Trail. This embankment along the West Fork of the Trinity River is prone to flooding and breaching during major rainfall events. When this happens, the trail is often closed for months or even years as resources are gathered to make repairs.

The Nature Center was awarded $350,000 in the City’s 2014 General Obligation Bond sale for this project. In addition, the Friends of the Nature Center secured a $25,000 grant from Wells Fargo to supplement available funding and matched the grant with a $50,000 donation raised through its various fundraising campaigns.

Local engineering firm Freese and Nichols, Inc. has been engaged for the design and construction plan. Currently, the projected month to award the construction contract is January 2016, with the work slated to take place February – June 2016. As with the Marsh Boardwalk project, please watch for updates via our website, Facebook page, and this publication.

Suzanne Tuttle
Nature Center Manager
Local Architect Wins National Award for Broadview Park Design

The Nature Center is pleased to share the good news that Paul M. Dennehy of Fort Worth’s Dennehy Architects, Inc. was awarded the 2014 Leicester B. Holland Award by the U.S. Department of the Interior for his single-sheet drawing of the Broadview Park Pavilion located at the Fort Worth Nature Center & Refuge.

Through a generous grant from the Meta Alice Keith Bratten Foundation, Paul was hired by the City of Fort Worth in 2012 to create a restoration plan for the group of structures originally built by the Civilian Conservation Corps at Broadview Park in 1935. Once the restoration is completed, the site will be available via reservations for large group gatherings and public events per recommendations made in the Nature Center’s Strategic Master Plan.

The Leicester B. Holland Award recognizes the best single-sheet measured drawing of a historic site, structure, or landscape submitted to the competition for inclusion in the permanent collection in the Library of Congress. It is intended to increase awareness, knowledge, and appreciation of these sites throughout the U.S.

Paul’s award-winning drawing is now on file in our nation’s capital for present and future generations to enjoy and study. The Friends of the Nature Center and the Nature Center staff extend our warmest congratulations to Paul for a job well done.

Suzanne Tuttle
Nature Center Manager

Paul’s accomplishment was recognized by the Parks and Community Services Advisory Board on September 24, 2014. Shown in this photo are (L to R) Paul Dennehy, AIA; Sheila Hill, Advisory Board Chair; Suzanne Tuttle, Nature Center Manager; Marty Leonard, President of the Friends of the Nature Center; and Richard Zavala, Director of the City of Fort Worth Parks and Community Services Department.

will be updating that plan for future years with direction from our part-time executive director, Laura Wood.

Thanks to a very generous grant from Lockheed Martin Aerospace Club, we will be purchasing a mini bus to be used for many programs with children and others.

We are well into our planning for Buffalo Boogie on May 9, 2015. A lot of thought and planning is going into this year’s event and how it can be improved. Please visit the events page at www.buffaloboogie.org for more information. If you know of anyone with interest in being a sponsor, please let me know and I will contact them.

We have lots of “irons in the fire” and an exciting future ahead. If you are already a member, we value you and look forward to seeing you at our wild place. If you have let your membership expire and/or know of others you think would like to be a member, please contact the Nature Center so we can get you on our membership roster.

We are so fortunate to have a place that we call The Fort Worth Nature Center & Refuge where we can relax, explore, exercise, enjoy, and soak in nature in all its beauty and mystery, constantly changing and inviting us to spend time there. It is truly a refuge, not only for us humans, but also for all the critters and creatures that call it home. I hope to see you there soon.

Marty Leonard
President

Sponsors and vendors play an important role at Buffalo Boogie each year, helping to offset the cost of the race so proceeds can be used for the Nature Center. To learn more about how to become a sponsor or vendor at this year’s race, see the ad on page 10 for more information.

Photo by: Jerry Kneupper
Welcome to Elizabeth Bittner, New Education Naturalist

On January 12, Elizabeth Bittner joined the Nature Center’s education staff. She brings a variety of experiences and talents to the position, and we are excited to have her on our team. I asked her to tell us a bit about her background and perspective on the profession of environmental education. Please join me in welcoming her to the Nature Center!

Suzanne Tuttle
Nature Center Manager

Looking back on my college career at the University of Texas at Austin, I’m not certain I had any clear idea of what I was going to do after I graduated. I simply picked something I enjoyed, cultural anthropology and Asian studies, and made that my major. After receiving my bachelor’s degree, I headed straight into graduate school, also at UT, and began studying book and paper conservation, where I learned how to repair and preserve paper materials for archives, libraries, and museums.

After I graduated with my master’s degree, I discovered two things. First, even though I found book and paper conservation intellectually interesting, I didn’t feel like I was having an impact on the larger world. Second, with the economic downturn, many facilities weren’t hiring conservators. I eventually stumbled onto AmeriCorps and served a year at Topsail Hill Preserve State Park in Florida, assisting with everything from sea turtle monitoring to invasive plant removal, water sampling, and educational programming. Later, after spending six months as a front-line interpreter at the Houston Zoo, I landed a job with Arkansas State Parks, starting out as the park interpreter at DeGray Lake Resort State Park then moving to Crowley’s Ridge State Park. I jumped at the chance to move back to Texas, and closer to family, when I saw an opening at the Fort Worth Nature Center.

I like to joke that I moved from one misleading job title to another when I went from being a conservator (but not of the environment) to an interpreter (but not of languages). I describe interpretation as taking what is special about a place and translating that into activities that help people form an emotional bond with that place. My degrees would seem to have little to do with my profession, but a liberal arts education often centers on the ability to take information and pick out what is important and relevant, taking into account the environment in which the information is presented. In other words, the what, why, when, where, and who. These skills can also apply to environmental interpretation. What am I really trying to say about this plant/animal/habitat? Why is this important for the guest to know? Who is my guest and what do they want out of this experience? At the Fort Worth Nature Center & Refuge, everyone can find something that touches them, even if it isn’t the same exact thing that speaks to me, and that is what I find so interesting and exciting about being an interpreter.

Elizabeth Bittner
Naturalist/Education Programming
On February 21, the Hardwicke Interpretive Center was the hub for the Fort Worth Nature Center’s annual Hands and Hearts appreciation celebration. This event celebrates our volunteers’ accomplishments and shares their accolades with the audience. We are grateful for their collaborations and dedication to the Nature Center and the community. With their support, the Nature Center is able to provide guided tours to hundreds of students, care for the daily needs of educational Wild Ambassadors, grow native plants, restore habitats, and so much more.

The Hands and Hearts celebration featured delicious food, including the delectable Tres Leches cake, the honorees’ favorite dessert that has become an annual tradition. Following the scrumptious meal and time for socializing, those volunteers who had achieved significant milestones either by cumulative hours accrued over the years and/or special recognition for their 2014 contributions were recognized. Like previous years, the Golden Awards brought plenty of smiles to the recipients and delighted the audience.

The honorees for 2015 Hands and Hearts for hours served, and for accomplishing special projects through the end of 2014 are:

**Golden Awards Honorees**
Sue Bonham and Sue Hall – Animal Care
Marsha McLaughlin - Administrative
Marshall Fox & David Jobe - Docent
Sam Scarborough - Greenhouse
Bren Ledbetter – Natural Guard
Olivia Aviles – Teen Volunteer

**1500 Hours – Name on the Volunteer Hall of Fame Plaque**
Kristen Gambill

**500 Hours – Buffalo Pin**
Wayne Duke

**400 Hours – Great Blue Heron Pin**
Lani Aker
Greg Hudgins
Jim Nash

In Memorium: Art Jones

Art Jones, longtime member of the Friends of the Nature Center, passed away the weekend of February 7. Art served many years on the Friends of the Nature Center Board, resigning his position in February 2012, citing the noblest of reasons – to devote his time to raising his and his wife’s four young grandchildren living with them.

Art’s letter of resignation reflected his love and appreciation of the Fort Worth Nature Center and dedication to the Friends of the Nature Center:

“I hold a very warm place in my heart for the Nature Center. My children, and now my grandchildren, continue to enjoy walking the trails, bird watching at the Boardwalk, and visiting Greer Island. It is a wonderful opportunity for them to observe a wide variety of Nature so close to home.

“I will be happy to assist whenever I can and share my experience with marketing, publicity, or advertising for the Nature Center.”

Nature Center Manager Suzanne Tuttle notes, “Art and his grandchildren rescued and brought two of our current Ambassador animals to us – the opossum and one of our Texas spiny lizards. He had a huge, kind heart.”

It is because of the devotion of folks like Art Jones that the Friends of the Nature Center has been able to provide strong support to the Nature Center over the years.

On behalf of a very appreciative Board of Directors, the Friends of the Fort Worth Nature Center & Refuge expresses its condolences to Art’s loving wife, Joan, and their many family members. He will be greatly missed.

It’s never too early to start planning for ways to entertain the kids over summer break. Why not give them a chance to join the naturalists at the Fort Worth Nature Center to discover the hidden treasures of the natural world? While searching for interesting animals, plants, and minerals, the children will explore multiple different habitats found around Lake Worth and the West Fork of the Trinity River. They will also have opportunities to meet our animal ambassadors, make crafts, and play nature-themed games.

Summer Natural History Adventures will be offered for eight weeks starting Monday, June 8. Each adventure is targeted towards a different age group from kindergarten through 6th grade. Due to popular demand, two identical classes will be offered each week for 1st and 2nd graders. To take advantage of the cooler morning hours, an earlier start time of 8:30 a.m. will be in effect this year. Full-day adventures for 1st graders and older will end at 3:00 p.m., with after-care offered for an additional fee until 4:30 p.m. Half-day adventures for kindergarteners will end at 11:30 a.m.

Stop by the Hardwicke Interpretive Center and pick up a brochure, or check out our website at www.fwnaturecenter.org for pricing, program descriptions, and registration instructions.

2015-16 Board Nominations Being Accepted Now

Directors and Officers: Each is a 2-year term (unless filling an unexpired term)
Officer Positions Available: Recording Secretary & Corresponding Secretary

If you are interested or know someone who is, you may have a Friends member nominate you or nominate someone yourself. This is a dynamic working board. All are expected to be actively involved. Board member information and the nomination form are available on pages 17 & 18. Your nominee must be a member of the Friends to join the board, and joining is easy if your nominee is not.

Deadline for Nomination Forms is Friday, May 1.

Questions? Call Rick Shepherd 817.320.6383
[or email: rickshepherd46@att.net ]

FRIENDS OFFICE—817-392-7410
by noon July 10
Member of the Board of Directors
Job Description and Expectations

Purpose: To advise, govern, oversee policy and direction, and assist with the leadership and general promotion and fundraising of the Friends of the Fort Worth Nature Center & Refuge, Inc. (FONC) so as to support and further the organization’s mission and needs.

The mission of the FONC is to preserve, protect, and conserve in perpetuity the Fort Worth Nature Center & Refuge.

*Major responsibilities:
- Organizational leadership and advisement
- Organization of the board of directors, officers, and committees
- Formulation and oversight of policies and procedures
- Financial management, including adoption and oversight of the annual budget
- Oversight of program planning and evaluation
- Review of organizational and programmatic reports
- Promotion of the organization
- Fundraising and outreach

*Members of the board share these responsibilities while acting in the interest of FONC. Each member is expected to make recommendations based on his or her experience and vantage point in the community in both regular BOD meetings as well as on his or her respective committees.

Expectations of board members:
- Financially support FONC in a manner commensurate with one’s ability
- Attend and participate in meetings on a regular basis and special events as able
- Participate on a standing committee of the board and serve on ad-hoc committees as necessary
- Be alert to community concerns that can be addressed by FONC’s mission, objectives, and programs
- Help communicate and promote FONC’s mission and programs to the community
- Become familiar with FONC’s finances, budget, and financial/resource needs
- Understand the policies and procedures of FONC
FRIENDS OF THE NATURE CENTER
NOMINATION FORM FOR BOARD OF DIRECTORS MEMBERSHIP

Name of Proposed Candidate: _____________________________________________________

To help the Nominating Committee know the candidate, we ask that you complete the following:

Please describe why you are proposing this candidate. What will he/she bring to the Nature Center, or in what specific areas could this candidate make a contribution to the Nature Center?

Please return to Rick Shepherd: rickshepherd46@att.net or 3216 Preston Hollow Road, Fort Worth, TX 76109

DEADLINE: NO LATER THAN FRIDAY, MAY 1, 2015
We are at the beginning of wildflower season in Texas! Early blooming wildflowers are carpeting our green spaces with a splash of color and distinct diversity. Some of these flowering plants experienced a head start by beginning to grow during winter. Texas bluebonnets, winecups, and Lindheimer daisies are a few of the wildflowers that survived the colder months as a cluster of leaves called a rosette found low to the ground. By growing near the surface of the ground, these wildflowers are able to retain heat and soil moisture until their growth accelerates with warmer temperatures. Another benefit acquired from germinating early is that these plants are able to claim more space and better compete to obtain essential resources for growth in the spring.

One of the most anticipated spring wildflowers is the bluebonnet. During winter, bluebonnet rosettes can be recognized by their clusters of five-leaved plants. Texas actually has five different species of bluebonnets that are all considered the state’s flower. If you look at flowering bluebonnets closely, you may see the similarity of the flower to a little bonnet worn by pioneer women. Another colorful early addition to open areas are the maroon goblet-shaped winecups. They can vary in color from dark red to pure white and can bloom as late as May. If you see a five-petal, star-shaped yellow flower on the prairie in March, you may have found a Lindheimer daisy. This wildflower is named in honor of Ferdinand Jacob Lindheimer, who is known as the “Father of Texas Botany.” He is credited with the discovery of several hundred plant species in the state.

So head outdoors to explore your nearby green spaces and take note of how incredibly fast wildflowers are growing and blooming. Each day may bring a new discovery for your viewing pleasure. Now, see if you can find the two bluebonnets below that are exactly the same!
